ABOUT

Laravel backend developer with 3+ years of experience building scalable REST APIs, AI-powered SaaS products, and e-commerce integrations for international remote companies. Specializing in API design, Shopify integrations, OpenAI API integration, queue systems, and real-time features. Based in Morocco and open to full-time remote opportunities worldwide.

WORK EXPERIENCE

Freelance Backend Developer

Self-Employed | Nov 2024 – Present | Remote

- ▶ Built and shipped AI-powered SaaS products using Laravel, OpenAI API, and modern full-stack tools.
- ▶ Designed scalable multi-tenant architectures with role-based access control and Stripe subscription management.
- ▶ Integrated OpenAI GPT-4 for intelligent features including NLP booking assistants and AI usage analytics.
- ▶ Strengthened expertise in microservices, REST APIs, queue systems (Laravel Horizon), and Docker deployments.
- ▶ Leveraged AI tools (GitHub Copilot, ChatGPT) to accelerate development workflows and code quality.

Skills: Laravel · OpenAI API · Next.js · Redis · Docker · Stripe · PostgreSQL · Vue.js

Back End Engineer

Le Ventures | Dec 2022 – Nov 2024 | United States · Remote

- ▶ Developed backend services with a focus on intricate API design and seamless integration with front-end frameworks.
- ▶ Created and executed integrations with Shopify and various e-commerce platforms using Shopify Admin GraphQL API.
- ▶ Built technical architectures and solutions aligned with project goals and business requirements.
- ▶ Implemented Agile methodologies — daily stand-ups, sprints, estimation, and planning for timely delivery.
- ▶ Conducted code reviews and approved pull requests on GitHub to maintain high code quality.

Skills: Laravel · Vue.js · Docker · Shopify · PostgreSQL · Git · React.js

Software Engineer

Tecizeeverything | Apr 2021 – May 2022 | United Kingdom · Remote

- ▶ Built mobile applications using Flutter with robust API design and seamless backend integration.

Skills: Flutter · Mobile Development · PostgreSQL · MERN Stack · MongoDB · React.js

Web Development Intern (Java/React.js)

Weenko | Mar 2021 – Aug 2021 | Morocco

- ▶ Implemented a solution for supervising business processes of a service bus using Spring Boot and React.js.

FEATURED PROJECTS

LISA — AI Virtual Try-On Shopify App

[Laravel](#) · [Shopify API](#) · [AI Vision API](#) · [GraphQL](#) · [Vue.js](#) · [Docker](#) · [PostgreSQL](#)

- ▶ Built and shipped a Shopify embedded app that lets customers virtually try on clothing using AI image processing.
- ▶ Merchants install it with zero technical setup — integrated with Shopify OAuth and Admin GraphQL API in Laravel.
- ▶ Reduces return rates by helping shoppers visualize outfits on their own photo before purchasing.
- ▶ Increases conversions through social sharing — customers share their virtual outfits directly from the store.
- ▶ Multi-tenant architecture — each merchant store fully isolated with independent usage and configuration.

Real-Time Delivery Tracking API

Laravel · PostgreSQL + PostGIS · WebSockets · Redis · Docker · Queue Jobs

- Built a real-time GPS delivery tracking system with driver location updates every 5 seconds via WebSockets.
- Integrated Laravel Broadcasting for live location streaming from drivers to customers.
- Used PostGIS for geospatial queries, distance calculations, and route-based ETA prediction.
- Implemented queue jobs for order status updates, push notifications, and delivery event processing.

Multi-Tenant SaaS API Platform

Laravel · Laravel Horizon · Redis · PostgreSQL · RBAC · Docker · Next.js

- Built a complete multi-tenant SaaS backend where multiple companies share infrastructure with fully isolated data.
- Implemented role-based access control (RBAC) and API rate limiting per plan for fine-grained access management.
- Used Laravel Horizon for real-time queue monitoring and Redis for caching and performance optimization.
- Designed clean RESTful API architecture with per-tenant configuration, onboarding flow, and usage analytics.

SKILLS

Languages & Frameworks

JavaScript/TypeScript, PHP, Python, Java, HTML, CSS | Laravel, Vue.js, React.js, Next.js, Node.js, Flutter, Spring Boot

AI & Integrations

OpenAI API (GPT-4, GPT-4 Vision) | Shopify API & App Development | AI-powered SaaS | GitHub Copilot | Stripe / Laravel Cashier

Backend & Infrastructure

REST API Design | Multi-tenant Architecture | Laravel Horizon & Queues | WebSockets / Pusher | Docker | Redis | PostGIS

Databases & Tools

MySQL, PostgreSQL, MongoDB, SQL Server | Git, npm, yarn, Docker

EDUCATION

Master's Degree in Intelligent and Mobile Systems

Sidi Mohamed Ben Abdellah University | 2019 – 2021

Bachelor's Degree in Web Technologies and Programming

Cady Ayyad University, Faculty of Science Semlalia | 2018 – 2019

LANGUAGES

Arabic	English	French	German
Native / Bilingual	Full Professional	Professional Working	Elementary (Learning)
